SIZERIGHT

OliverTM
Processing for a more productive planet.

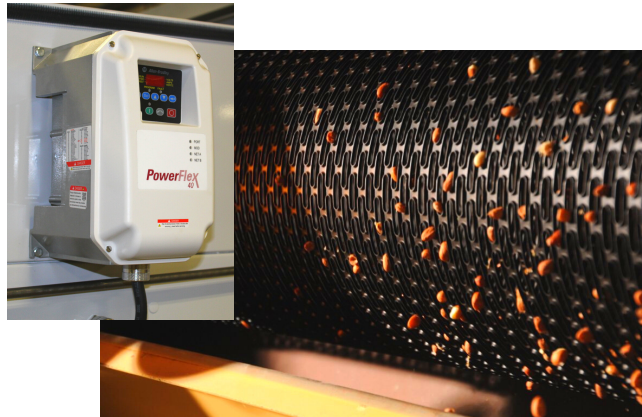

OUR HISTORY

Starting in 1930, our company began as a small manufacturer of the Oliver Gravity table. Selling to our international customers our company expanded through the years, leading to us selling destoners, dryers, and SIZERIGHT machines. If you want the best in processing equipment look no further than *Oliver Manufacturing*.

Nothing matches to the performance of a **SIZERIGHT** machine .

OPERATING CONTROLS

VFD controls for cylinder speed, manually adjusted feed gate for product flow, all moving parts protected behind doors, and a start/stop button that controls the cylinder quick change position.

ABOUT THE SIZERIGHT

PERFORMANCE

With our engineered punch-punch-form process, making cylinders for your specific application, you can be assured of the highest quality sizing separator possible. You also get the added benefits of our quick-change cylinder system optimizing both run time and flexibility.

RELIABILITY

With 90 years in the business we know the best way for your machine to run. For instance, the Kevlar belt system you are ensuring longevity of your machine, reduction of noise, and the best cylinder synchronization for your separating needs.

CONFIGURATIONS, CUSTOMIZATIONS, AND OTHER OPTIONS

The roller cleanout PLC or pneumatic can have the option to be automatic or manually controlled. This reduces the plugging of your machine; in return you get an increase in the efficiency of your machine. You can also have the option of multiple size options, custom doors, and stainless steel contact points.
